

WISCONSIN NATIVE PLANT NURSERIES

This directory was compiled by the Natural Heritage Conservation Program, Wisconsin Department of Natural Resources. Inclusion in this directory does not imply any endorsement or recommendation by the Wisconsin DNR. Revisions or additions to the directory should be sent to NHC, WDNR, PO Box 7921, Madison, WI 53707 (Attn: Amy Staffen), phoned in at (608) 220-6942, or e-mailed to Amy.Staffen@Wisconsin.gov.

This directory lists companies, individuals, and organizations that may be able to provide you with seed or plants native to Wisconsin or the Midwest. The directory is divided into two major sections, with regional subsections for each of them (click on name to jump to that section):

- 1) [Nurseries which primarily carry plant material native to Wisconsin and adjacent states](#)
- 2) [Nurseries which carry native Midwestern plants, wild-dug plants, or a mix of native and non-native plants](#)

When doing any plantings to restore or recreate a natural area, it is best to obtain seeds or plants from as close to your planting site as possible. Most nurseries are willing to tell you the source of their plants; ask for the source if your intent is to purchase nursery-propagated plants or locally obtained seed.

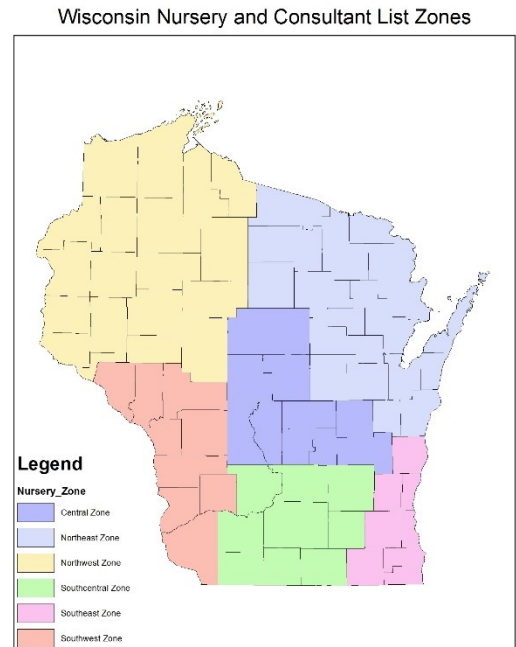

Please note that while Section 1 lists vendors of native plants from Wisconsin or within 100 miles of the border, Section 2 lists vendors of plants native to the Midwest, but not specifically from Wisconsin or the immediately surrounding area.

1) Nurseries which primarily carry plant material native to Wisconsin and adjacent states

When doing any plantings to restore or recreate a natural area, it is best to obtain seed or plants from as close to your planting site as possible. Most nurseries are willing to tell you the source of their plants; ask for the source if your intent is to purchase nursery-propagated plants or locally obtained seed. All out-of-state nurseries listed are within approximately one hundred miles of Wisconsin.

2) Nurseries which carry native Midwestern plants, wild-dug plants, or a mix of native and non-native plants

The following companies sell plants native to the Midwest, but not specifically from Wisconsin or the immediately surrounding area. Many of these companies also sell non-native species. If your objective is to use only native species, use discretion in the species you select from these nurseries, or ask for plants which came from your region. The following nurseries may collect from the wild, and where known, this is indicated.

GreenLine Synergy, LLC has developed and patented a product called pre-vegetated blanket that expedites establishment of native communities. Made using all the traditional methods and materials, the product takes 4-6 weeks to get actively growing native vegetation. It is then installed on projects where immediate vegetation is desired. This product establishes in approximately 1-2 weeks and secures the site post-construction.

Contact: Robert Livingston | Address: 215 Burden Ave., Twin Lakes, WI 53181

Phone: (262) 877-3741 | Email: grow@greenlinesynergy.net | Web: www.greenlinesynergy.net

Johnson's Nursery, Inc. is a full-service nursery grower with an extensive line of native Wisconsin woody plants as well as herbaceous forbs and grasses. Most of the plants sold are propagated at the nursery from local ecotype seed sources. Johnson's woody plants range from one-gallon containers to large B&B trees up to 6" in trunk diameter.
