TIME	LESSON OUTLINE	AID CUES
0:00	E-Educate Background - It is important to follow a pre-ride inspection to make sure your ATV is in safe working order. You will learn the safe Start Up Procedure to use when you begin your ride. This should become common practice to follow every time before you ride. NOTE: It would be beneficial to have several ATV's and	ATV(s)
	instructors available to break into small groups. But this can be done with one ATV in front of the entire group. D-Demonstrate	
	Instructor will complete a pre-ride inspection with an ATV utilizing CHEC FIRST. CHEC FIRST:	CHEC FIRST Handout
	Chain/Drive Shaft: 1. Check for damage, tightness	
	2. Add lubrication as needed.	

Handlebars:

- 1. Move left and right to check ease of steering.
- Check all controls on handlebars. The levers should move smoothly and snap back into positions when released.
- 3. Turn light switch on and check headlight, taillight and brake light.
- 4. Make sure cables are not damaged or kinked.

Exhaust:

- 1. Spark arrestor must be U.S. Forest Service-approved.
- 2. Muffler should not be damaged, rusty or leaky.
- 3. Adding loud aftermarket exhaust systems is illegal.

Chassis / Transmission:

- 1. Check for loose or worn parts.
- 2. Check shifter for smoothness.
- 3. Check for leaks or noise.

Fuel / Filter:

- 1. Make sure all are full, gas, oil, coolant and brake fluid.
- 2. Check fuel lines for leaks.
- 3. Check air filter for debris.

Ignition and Engine Stop Switch:

- 1. Check ignition switch and test engine stop switch.
- 2. Make sure battery is charged and not damaged.

Registration:

- 1. Check registration decal or trail pass for expiration and visibility.
- 2. Carry registration card/certificate and ATV Safety Certificate as required.

Spare parts / Tool kits:

- 1. Carry spare parts (spark plugs, tire repair kit, duct tape, etc.
- 2. Check tool kit and owner's manual.

Tires and wheels:

1. Check for proper air pressure (low tire pressure gauge).

3. Check lug is O-Observe Observe students ATV. Utilizing a CHEC student to perform handout (Form B)	es for wear and damage. nuts and wheel bearings. s perform CHEC FIRST procedure with an FIRST handout (Form A), choose one m inspection. Utilizing CHEC FIRST another student will conduct an	В
