This document lists the Invasive Species Council's recommended regulatory status for species of the No Commercial Use Plants Species Assessment Group (SAG). These recommendations are the council's proposed revisions to the Invasive Species Identification, Classification, and Control Rule (Chapter NR 40, Wis. Adm. Code). The council advises the department on a number of invasive species issues, including how to classify invasive species.

SAGs are advisory to the council, and are collections of stakeholders and experts that have valuable input for the species being reviewed. Like the council, they come from a variety of backgrounds including industry, research, education, tribal nations, and local/state/federal government. SAGs review the literature available on the species they're examining and develop recommendations to the council on the regulatory status for each species. The council then votes on these recommendations to produce the list below.

These proposed revisions will be presented by the SAG Coordinator via an online Zoom session on February 28, 2024 from 6:00pm – 7:30pm.

If you would like to register for this Zoom session or have feedback or questions related to the regulatory status of any of the species below, please visit the council website at:

<https://dnr.wisconsin.gov/topic/invasives/InvasiveSpeciesCouncil>

If you would like additional information, such as the literature review for a specific species, please email DNRInvasiveSpecies@wisconsin.gov.

The council will review all feedback received from these sessions before proposing their final recommendations to the department. The department will then begin the official rule making process, during which there will be additional opportunities for public comment.
